OBAGI C-Rx System

An advanced system that addresses early signs of damage

- Designed exclusively for young-looking skin, the Obagi-C® Rx is the early intervention system that:
- Corrects hyperpigmentation by regulating the production of melanin-producing cells
- Accelerates skin turnover through gentle exfoliation to restore balance and radiance to lackluster skin
- Minimizes future skin cell damage by neutralizing free radicals and protecting the skin from UVA and UVB rays

Who is the ideal Obagi-C® Rx System patient?

Those who:

- Have young skin
- Minimal fine lines
- Minimal unevenness of skin tone
- Mild hyperpigmentation
- Exhibit emerging signs of photodamage
- Are not ready for or are intolerant to retinoid therapy
- Routinely invest in cosmetic and cosmeceutical products for aging prevention
- Desire a physician-recommended, prescription-strength regimen for early intervention
- May not be ready for the strength of the Obagi Nu-Derm System

Obagi-C® Rx System can build patients' confidence and grow your practice

The comprehensive Obagi-C Rx System is a prescription-strength, physician dispensed regimen that provides the necessary elements to ensure young-looking skin stays that way by:

- Correcting early signs of hyperpigmentation and age spots
- Preventing future damage by promoting cell turnover
- Protection from the environmental stressors that can accelerate the visible signs of the aging process
- The first and only corrective combination of prescription-strength 4% hydroquinone and potent L-ascorbic acid vitamin C

Let the Transformation Begin

Find out about Obagi System skin care products and how they Transform your skin at the cellular level to look and act younger and healthier.

- **Obagi Nu-Derm System** accelerates cellular turnover for skin with moderate to severe sun damage.
